

## UCR PLANNING FRAMEWORK *(Updated June 12, 2020)*

The table below provides high-level guidance as the UCR campus moves through a gradual return to on campus activities. Information in the table derives from the efforts of several campus level committees with broad representation. Each section is backed by more detailed guidance from the appropriate committee.

Public health guidance is based on a hierarchy referencing:

- 1) Guidance from Riverside County public health officer
- 2) State of California Department of Public Health
- 3) Centers for Disease Control or other Federal level guidance
- 4) In the absence of concrete guidance from the above, other reputable organizations such as the WHO or similar

In addition, guidance from UCOP is referenced and reviewed throughout.
